# WARNING

Please DO NOT proceed with assembly if the floor is not level or the frame doesn't measure as described on page 12.

If the inner frame width does not measure 42.51" +/- 1/8" (as shown in the picture on page 12), please loosen frame bolts and push or pull the frame.

If the floor is not level (as shown in the picture on page 12), then the options are:

- placement elsewhere
- turning the machine at a different angle
- raising the proper area on the floor so the feet sit level with the rest if the feet (use a leveler on the smith bar in this case)

**FAILURE TO DO THIS WILL RESULT IN DISTORTION  
OF THE SMITH MACHINE CAUSING IT  
TO NOT GLIDE PROPERLY**
