

THROWDOWN HIIT SKI

The Throwdown HIIT SKI replicates the exhilarating motions of cross-country skiing within the confines of the gym. Its sleek design and user-friendly interface make it an enticing addition to any workout space. As one of the few fan-based resistance machines that train upper-body endurance, the HIIT SKI works harder against you the harder you work, taxing your arms, legs, core and cardio! Whether you're a seasoned athlete or just starting your fitness journey, the HIIT SKI's ability to provide a dynamic full-body workout is undeniably impressive.

TRACK YOUR INTENSITY

Track your workout with detailed metrics, follow one of the built in workout programs, and connect to your phone via Bluetooth to save and share your workout. The console also comes equipped with ANT+ giving you the ability to pair with heart rate trackers and connect to group displays.

HIIT PROGRAMMING

Have your trainers and coaches HIIT certified by our Master Instructors, leverage our unique HIIT products to attract members and learn to market your own exciting HIIT program to create a new source of revenue for your facility.
